LONDON, Aug. 19 (By U. P.).—One American was killed and nine others were in hospitals today after the wreck of a French Air Union passenger plane en route from Le Bourget Airdrome, near Paris, to Croydon, the London airport.

Plane Crashed in Fog

The injured persons were taken to hospitals in Sandgate and Folkestone.

Fog and engine trouble caused the crash near Romney Marshes, England. The four-engined plane had left Paris at 12.30 p. m. on its regular flight to London and had crossed the Channel safely. The machine was seen to circle toward the ground, with only one propeller turning. It crashed into a barn, turned and struck a haystack.

Fonck Ready To Test Plane For Sea Flight

WESTBURY, L. I., Aug. 19.—Only a downpour of rain can keep from the air today the Sikorsky airplane in which Capt. Rene Fonck, Capt. Homer M. Berry and a third man will attempt to fly from New York to Paris within the next few weeks.

The craft stood ready in its hangar.

A few mechanics worked at the various parts of the plane, but most of them stood about the doors of the hangar anxiously scanning the sky and hoping for a clearing.
